

VARDAN BABAJANYAN

Backend Engineer · 3 Years of Experience

Backend Engineer with 3 years of hands-on experience building production-ready systems. Specialised in Node.js microservices, relational and NoSQL databases, and payment integrations with Stripe and Square. Delivered solutions across 5+ projects in fintech, logistics, and SaaS — from architecture to deployment. Equally comfortable with no-code tools like Bubble, Flutterflow, and n8n when speed matters.

Phone: +374 77 946 664

EDUCATION

Armenian State University of Economics

B.Sc. in Management

Aren Mehrabyan Foundation

Node.js Intensive Programme

TECHNICAL SKILLS

Node.js	TypeScript
JavaScript	PostgreSQL
MySQL	MongoDB
Redis	RabbitMQ
Docker	GitHub / Git
REST APIs	Stripe / Square
Bubble	Flutterflow
n8n	WordPress

SOFT SKILLS

- Clear verbal & written communication
- Active listening & empathy
- Self-discipline & ownership
- Team collaboration
- Problem-solving mindset

LANGUAGES

Armenian	Native
Russian	Fluent
English	Professional

PROFESSIONAL EXPERIENCE

Backend Engineer

Jul 2023 – Present · 2+ yrs

InPoint

- Architected and maintained scalable **Node.js microservices** handling high-concurrency traffic, improving backend throughput by over 30%.
- Designed and integrated **RESTful APIs** consumed by web and mobile clients, including full documentation and versioning.
- Built secure payment flows using **Stripe** and **Square**, handling subscriptions, refunds, and webhook reconciliation in production.
- Managed complex data layers across **PostgreSQL**, **MySQL**, **MongoDB**, and **Redis** — choosing the right store for each use-case.
- Implemented asynchronous job queues with **RabbitMQ**, decoupling services and improving system resilience.
- Containerised all services with **Docker**; contributed to CI/CD pipelines using GitHub Actions.
- Delivered solutions across **5+ projects** spanning fintech, logistics, and SaaS domains.

Logistics Specialist

2022 – 2023

Cross Country

- Managed end-to-end coordination of inbound and outbound shipments with consistent on-time delivery.
- Primary communication bridge between warehouse teams, carriers, and customers — maintaining full traceability records.

KEY PROJECTS & HIGHLIGHTS

● Payment Platform

Built a multi-currency payment engine integrating Stripe & Square with webhook-driven reconciliation, serving thousands of transactions monthly.

● Event-Driven Architecture

Designed a RabbitMQ-based message broker system reducing inter-service coupling and enabling async processing at scale.

● Database Optimisation

Migrated critical queries to use proper indexing and caching strategies (Redis), cutting average API response times significantly.

● No-Code Integrations

Delivered rapid MVPs for clients using Bubble, Flutterflow, and n8n — bridging the gap between business needs and technical delivery.
